Driven and innovative individual looking to gain professional experience and further my skills in a demanding environment as a web developer. Bringing a(n) keen eye for details, self-starter attitude, ability to quickly learn cutting-edge technologies, and experience with developing web applications using HTML, CSS, JavaScript, and Vue.js.

## EXPERIENCE

**AUGUST 2021 – PRESENT**

**FRONT END DEVELOPER**, ACCENTURE

Projects:

- My Access – UI Developer
  - Utilize AngularJS to develop custom ServiceNow widgets for Accenture's support portal that is used by 100,000+ Accenture employees
  - Help onboard new team members to the project and assist team members when they're blocked with their ticket(s)
  - Collaborate across different teams and product owners to implement project features
  - Demo newly implemented project features to stakeholders
  - Review pull requests as the fill in for the UI team lead while they are away
  - Participate in monthly deployment releases to production

## SOFTWARE DEVELOPMENT PROJECTS

**MTG PRICE SCRAPER** ([HTTPS://GITHUB.COM/CHATAOLAUJ/MTG-PRICE-SCRAPER](https://github.com/chataolauj/mtg-price-scraper))

- Created a REST API using the Express.js framework
- Built a locally hosted Node.js script to scrape for card prices every 4 hours on the web and to update the card prices in the database
- Used Vuetify framework to make website mobile responsive and look modern

**LOCAL EVENTS** ([HTTPS://GITHUB.COM/CHATAOLAUJ/LOCAL-EVENTS](https://github.com/chataolauj/local-events))

- Learned how to develop a single page application (SPA) using JavaScript and the Vue.js
- Consumed Eventful API to get event data that closely matches a user's search criteria
- Debugged and tested HTTP requests made to the Eventful API using Postman
- Deployed and hosting the web application on Heroku

## EDUCATION

**DECEMBER 2018**

**B.S. COMPUTER SCIENCE**, UNIVERSITY OF NORTH CAROLINA AT CHARLOTTE

## SKILLS

- HTML
- CSS/SCSS
- JavaScript
- Vue.js
- Node.js
- MongoDB
- Git
